  - HTML5, CSS, JavaScript, Bootstrap
  - ReactJS
  - Git and Github
  - MongoDB
- I've keen interest in Cloud Computing, Problem-Solving, Cyber Security, learning new technologies and building meaningful software solutions.

Achievements

ONLINE EXAM PORTAL

- Developed this project using **Java**, **Spring Boot**, **Rest**, **Microservices** & **JPA** as backend technologies and **HTML**, **CSS**, **Bootstrap** & **ReactJS** as frontend technologies.

- Each microservices exposes a set of **REST**/**JSON** endpoints for accessing business function using Spring Boot framework.

- Microservices are built with **Spring Boot**, which has an embedded **Tomcat** server as the HTTP listener.

- **Stripe** has been used as the payment gateway
